Hiring Manager

ACCIONA

Dear Hiring Manager, I am writing to express my interest in joining ACCIONA.

With a background in mechanical engineering and over five years of experience delivering large-scale mining and infrastructure projects at Hatch, I have developed a strong foundation in project execution, commissioning, engineering design, and multidisciplinary collaboration. I am excited by the opportunity to contribute these skills to a company recognized for delivering sustainable infrastructure around the world.

At Hatch, I worked on projects from design through commissioning, supporting mining, processing, and infrastructure developments.

As a Handover Coordinator on the Jansen Potash Project, I prepared handover and subsystem test packages, coordinated Notices of Energization, and worked closely with construction, commissioning, and operations teams to ensure the safe and efficient transition of systems into service. This role strengthened my ability to coordinate multiple stakeholders, manage project documentation, and maintain progress in a fast-paced site environment.

I also contributed to package engineering for lithium, copper, and refinery projects, as well as tunnel fire ventilation design. Working across multiple disciplines and project phases gave me a broad understanding of engineering execution and the challenges involved in delivering complex infrastructure safely, efficiently, and on schedule.

Alongside my engineering responsibilities, I developed software solutions to improve engineering workflows and operational efficiency. These included real-time industrial systems, engineering automation tools, and computer vision applications used in mining operations. While software development was only one aspect of my role, it strengthened my analytical thinking and reinforced the importance of delivering practical solutions that support field teams and project execution.

What attracts me most to ACCIONA is the opportunity to contribute to projects that have a lasting impact on communities while working for a company committed to innovation and sustainable infrastructure.

I enjoy working in collaborative, site-oriented environments where engineering decisions translate into tangible results, and I am eager to continue developing my career on challenging infrastructure projects.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my experience in engineering, commissioning, and project execution can contribute to ACCIONA's continued success.

Sincerely, **Nebojsa Jovanovic**
