

Cover Letter

Dear Hiring Manager,

I am writing to express my interest in joining Graham. With a Mechanical Engineering degree from the University of Toronto and over six years of experience at Hatch, I have built my career delivering engineering solutions on large industrial projects while combining hands-on field experience with software development and automation.

At Hatch, I have worked in several roles, including Commissioning Engineer, Package Engineer, and Software Developer. I have supported the execution of large mining and processing projects, including the Jansen Potash Project, where I coordinated system handovers, prepared commissioning documentation, and worked closely with construction, operations, and contractor teams to safely transition systems into operation. I have also contributed to lithium, copper, and tunnel ventilation projects, giving me experience across multiple industries and project phases.

Beyond traditional engineering, I have developed software and automation tools that improved engineering workflows and project execution. Whether automating documentation, developing industrial software, or creating computer vision solutions for mining applications, I enjoy finding practical ways to improve efficiency and solve complex engineering challenges. My ability to work comfortably in both office and field environments has allowed me to bridge the gap between engineering design, construction, commissioning, and technology.

I am particularly interested in Graham because of its reputation for delivering complex infrastructure, industrial, and building projects while maintaining a strong commitment to safety, quality, and collaboration. I enjoy working on large multidisciplinary projects where teamwork, technical problem-solving, and execution are essential to success, and I would welcome the opportunity to contribute to Graham's project teams.

Thank you for considering my application. I would appreciate the opportunity to discuss how my engineering background, project experience, and passion for continuous improvement can contribute to Graham's continued success. I look forward to speaking with you.

Sincerely, **Nebojsa Jovanovic**
