Hiring Committee

City of Toronto **Re: Application for Engineering Position** Dear Hiring Committee,
Toronto, ON

I am writing to express my interest in engineering opportunities with the City of Toronto. As a Mechanical Engineer with over six years of experience at Hatch, I have developed a broad background in engineering design, large-scale infrastructure projects, commissioning, site execution, systems engineering, automation, and software development.

During my time at Hatch, I worked across multidisciplinary teams on major industrial projects, including the Jansen potash project, where I supported commissioning activities as a Handover Coordinator. This involved coordinating engineering, construction, and commissioning stakeholders, preparing handover and testing documentation, and helping transition systems into operation. This experience strengthened my ability to work in complex project environments, manage technical information, and communicate effectively with teams across different disciplines.

I have also worked on mechanical package engineering and industrial systems, as well as developing software and automation tools to improve engineering and operational workflows. My experience includes C++, Python, computer vision, industrial automation, real-time systems, and edge computing. I believe this combination of traditional engineering experience and software and automation skills allows me to approach engineering problems from both a practical and systems-oriented perspective.

I am particularly interested in working for the City of Toronto because of the opportunity to contribute to infrastructure and services that directly impact the city and its residents. I would welcome the opportunity to apply my engineering experience to public-sector projects while continuing to develop professionally in a multidisciplinary organization.

Thank you for considering my application. I would appreciate the opportunity to discuss how my background and experience could contribute to the City of Toronto's engineering teams.

Nebojsa Jovanovic

Sincerely, Mechanical Engineer

Toronto, ON
